MY TRIP TO LUMUT MOUNTAIN

I last went on a trip on July 12, 2025. I went to Gunung Lumut, which is located in Sukamakmur, Bogor, with my friend. We departed at 06:00 and arrived at the Gunung Lumut basecamp at 08:30. There, I did tektok because I didn't have much time for camping.

The parking fee was 10,000, and the tracking fee was 25,000. It took me 2 hours to reach the summit. During the trek, there were many slippery cliffs, fitting the mountain's name, Lumut, and ropes were provided for holding. There are 2 routes to climb this mountain. The mountain is also suitable for beginners, as the tracking is not too difficult. There are 3 rest posts, and the summit is at 1699 meters above sea level.

This area can also be used for trail running. What I liked most there were the three waterfalls, even though they are all small. And there is a pond there, which is one of my favorite places, and the path to reach it is quite difficult. Even though I fell while trying trail running with the wrong shoes, it turned out to be a valuable experience for me.

As for the names of the waterfalls, the first one is Curug Penganten, the second is Curug Putri, and the last is Curug Ciberem. As for the waterfalls themselves, I wouldn't really recommend them because they are not suitable for swimming there. The part I liked the least is the waterfalls themselves, because I expected that the waterfalls could be used for swimming there.

and that might be my last trip to climb a mountain, because I don't really enjoy climbing mountains
